Discount Vs Profit

Sub Category: Profit& loss

Discount loss analysis

\$59,403 lost to high discounts

640 orders with discount $\geq 40\%$ collectively lost \$59,403. That's 55% of your total profit wiped out by discounting.

Zero-discount orders are most profitable

Orders with 0% discount generate the best margins. Cap discounts at 20% to protect profitability.

Discount-profit correlation: -0.27

Every discount increase negatively impacts profit. The relationship is clear — high discounts consistently destroy margin.

The loss in tables, Bookcases and supplies usually not because the discount.

Story
telling

West region is your profit engine

West generates **\$41,190** profit at **11.6%** margin — highest of all regions.

Technology is your Future

Technology: **19.7%** margin — best category

Tables category is bleeding money

Tables sub-category lost **\$12,387** over 4 years.

Furniture margin crisis

Furniture is **57%** of sales but only **2.8%** margin. **Chairs save it — \$23,656 profit.** Tables and Bookcases drag it down **\$16,143.**

Key Findings

Tables & Bookcases: **-\$16,143 loss** 640 high-discount orders caused: **-\$59,403 loss** Furniture: **highest sales, only 2.8% margin**
Technology: **19.7% margin — best category** West region: **\$41K profit, 11.6% margin**

Total Sales	Total Profit	Profit Margin	Discount Loss	YoY Growth
\$1,120,607	\$106,938	9.5%	-\$59,403	18.4%
+58% vs 2019	YoY Growth +86%	Furniture drags it down	640 orders >40% disc.	2021→2022

Chapter 1 The Growth Story: 4 Years of Rising Sales

Super Store grew consistently from 2019 to 2022, with total sales climbing from \$225,942 to \$357,820 — a 58% increase. Order volume also grew year-on-year, with 2022 alone accounting for 1,723 orders vs 995 in 2019. On the surface, this looks like a success story.

\$357K	+58%	1,723	18.4%
2022 Sales	vs 2019	2022 Orders	YoY Growth

Chapter 2 The Hidden Problem: Furniture is Dragging You Down

Furniture accounts for 57% of all sales — \$638,814. But its profit margin is only 2.82%. Meanwhile Technology, with less than 1/3 the sales volume of Furniture, delivers a 19.7% margin. The business is optimizing for revenue, not for profit. Within Furniture, Chairs save the category (\$23,656 profit). Tables and Bookcases are destroying it (-\$16,143 combined loss).

2.8%	19.7%	-\$12,387	-\$3,755
Furniture Margin	Technology Margin	Tables Loss	Bookcases Loss

Chapter 3 The Discount Trap: Buying Revenue at a Loss

The store has been using discounts aggressively to drive sales. 640 orders received discounts of 40% or more — and collectively, those orders generated a loss of \$59,403. That single number represents 55% of the store's total profit wiped out by discounting. The correlation between discount and profit is -0.27, meaning every time discounts go up, profit goes down.

-\$59,403	640	-0.27
Loss from ≥40% discounts	High-discount orders	Discount-profit correlation

Chapter 4 — Recommendations

1. Cap discounts at 20% company-wide

Eliminating ≥40% discount orders could recover **up to \$59,403** in annual profit — a **55% profit increase** from one policy change alone.

3. Shift sales focus toward Technology

Technology delivers **19.7% margin on \$181K in sales**. Scaling this category even **20% would add ~\$7,100 in pure profit** with no operational changes needed.

2. Audit Tables and Bookcases repricing immediately

These two sub-categories have been **loss-making for 4 years**. Either **reprice, reduce discounting** on them specifically, or **discontinue** .
